

Part I “Global CCS Update”

Dr. Filip Neele

Senior Scientist CCS
TNO Energy & Materials Transition

Filip Neele (FN) has a background in geophysics and has been active in the field of CCS since 2006, conducting R&D in the area of CO₂ transport and storage on a wide range of topics. He has coordinated the contributions from TNO to the development of the Porthos CCS project, in storage feasibility study and flow assurance. He coordinates the CO₂ capture, transport and storage research performed within TNO. He is cochair of the ZEP Technology Committee, developing topical reports to inform and European Committee. He recently edited and published a book on CCS ‘Deployment of Carbon Capture and Storage’.
