

## Japan CCS Forum 2024

### 第一部

### 「DAC および貯留における最新技術の進捗」

#### Part I

“Technological advancements in areas such as Direct Air Capture (DAC) and storage”

### モデレーター/Moderator

#### Hiroshi Nambo

Branch Representative Japan

Global CCS Institute

Hiroshi joined the Global CCS Institute in January 2012 as the Senior Advisor – Technology and appointed as Branch Representative – Japan in September 2012. He previously worked at Sumitomo Coal Mining for 26 years and was responsible for exploration and development in overseas coal and gas concessions, management of overseas coal mining operation, abandoned coal mine methane utilisation, R&D of ECBMR (Enhanced Coal Bed Methane Recovery) and CCS, CDM project development related to CMM & VAM (Coal Mine and Ventilation Air Methane) utilization, etc.

Hiroshi holds a Bachelor of Engineering in Resources and Environmental Engineering Department from Waseda University.
