

## Japan CCS Forum 2024

### 第一部 / Part I 講演6 / Session 6

**Adam Baylin-Stern**  
**Policy and Engagement Lead**  
**Carbon Engineering**

Adam Baylin-Stern is a Policy and Engagement Lead at Carbon Engineering, a direct air capture (DAC) company focused on the continual innovation of Direct Air Capture technology to provide it at the scale and cost the world needs to help address the climate challenge.

From 2018-21, he was as an official with the International Energy Agency (IEA) as part of the carbon capture, utilisation and storage (CCUS) unit and before this, the World Energy Outlook team, focused on net-zero policy and scenario analysis, as well as modelling industrial energy demand. Previously, he worked as a policy advisor to the Canadian Minister of Environment and Climate Change, contributing to the development and implementation of Canada's climate change and clean growth plan; as a research associate with Canada's Ecofiscal Commission and the Smart Prosperity Institute; and at Navius Research Inc., an energy-economy modelling consultancy.
